

A BENEFICIARY STORY:

Wang De Ying, 75 years old, from Tianping Village of Guangji Township, Sichuan China

Wang's foot was hurt during the 2008 Sichuan earthquake and lied on bed all day since then. He used to live with his son who has a newly-wed wife from another province. After the quake, his son went to the city to work and his daughter supports him. He received a steel grain bin for World Relief Canada's local partner to store their food grain.

His daughter, Wang Wei Rong, 47 year old, told the relief team that she felt stressful to support and take care of the two families. She and her husband also received a steel grain bin and this had relieved her worries of food being stolen away by mice.
