

Mrs. Nguyen Thi Thuy is 46 years old. Her family has 6 people. She said that before she has safe water from WTS her family used a dug well. The water in the dug well was salty and had a lot of iron. In the dry season they had no safe drinking water. They had to use water from the river for cooking.

Mrs Thuy was happy and said that WTS has good water. She said that the water was clear, did not smell, and was good for cooking and drinking. She liked the water especially because her washed white clothes were clean and white; it was much different than before. Her family saved money to build a new bathroom. Her family used 12m³ of water a month. The cost for 1 m³ was 3,500 VND (\$ 0.22) and they are able to handle the costs in order to have clean potable water.
